Huge updates!!!

You no longer have to type the full player name in any command. For example, you can type `/xyza freeze zim` instead of `/xyza freeze zimbabweh`

`/xyz cross` can be used as `/xyz c`
The cross command now tells you the block ID and data, for example, 35:13

Help menus look a lot better

`/xyz me` now includes Biome, Chunk, World, and Light level.

Hope you enjoy
